

WHY SHOULD YOU JOIN ?

ELES EXPO hosts professional buyer delegations from not only the Turkish market but also Europe, the Middle East, Africa, and Asia. This allows participating companies to establish important commercial connections in both domestic and international markets.

International delegations, government-supported buyer delegations, investors, and distributors are key elements that enhance the fair's global impact.

ELES EXPO 2026 is a showcase for ideas, products, and collaborations that will shape not only today's world but also tomorrow's. Participating here is a crucial step for your brand to transcend borders and establish a presence in the global market.

One-on-one meetings with international buyer delegations from target markets

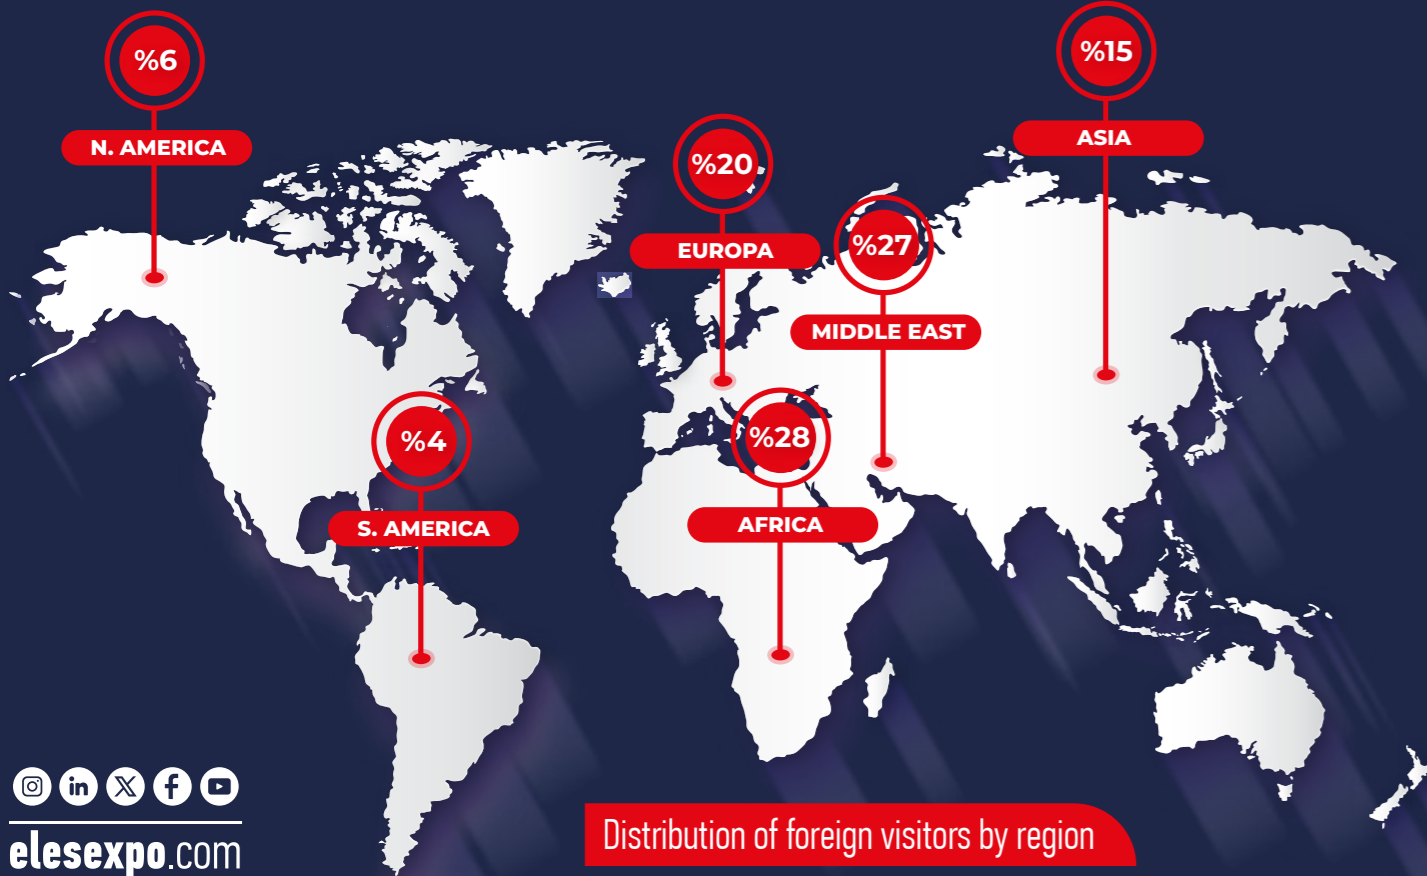

Direct contact with investors and distributors from Europe, the Middle East, Africa, and Asia

Sectoral panels, innovation presentations, and R&D-focused collaborations

International media visibility, corporate brand value, and export opportunities

Distribution of foreign visitors by region

ABOUT ELES EXPO

Turkey's production power, engineering capabilities, and technological vision are being showcased globally at ELES EXPO 2026!

ELES Expo is a visionary, export-focused platform that brings together the electrical, lighting, energy, and smart technologies sectors under one roof. It aims to showcase Turkey's manufacturing power to the world, bring new markets to the sector, and strengthen international collaborations.

Taking place at the Istanbul Expo Center, one of Istanbul's most prestigious fairgrounds, from April 23-25, 2026, ELES Expo will be the meeting point for a broad network spanning manufacturers and investors, technology and trade.

This special fair is not just a commercial event; it is also a visionary platform that will shape the future of the sector. ELES Expo brings together manufacturers and investors, solution providers and project developers, and local knowledge and global vision.

Our exhibitors are comprised of strong brands operating in the electrical, lighting, cables, switchgear, energy systems, building automation, and renewable energy sectors. Our visitors encompass a wide range of professionals, from international procurement delegations to contracting companies, public institutions and project developers.

VISITOR

PROFILE

ELES EXPO – The Electricity, Lighting, Energy and Smart Technologies Fair is a high-profile business platform that brings together industry decision-makers, technical experts, and international investors. The fair welcomes professional visitors from across Turkey and neighboring countries, offering participating companies new business opportunities, export connections, and long-term partnerships.

Exhibitors share their products and technologies directly with their target audiences, while visitors have the opportunity to closely examine the latest solutions, sectoral trends, and innovative applications. The fair is a meeting point for technical teams, project consultants, and supply chain managers involved in public and private sector projects.

Technical and Industrial Visitors

- Electrical engineers
- Mechanical and automation engineers
- Project consultants
- R&D specialists
- Technical purchasing managers
- Construction site managers and field engineers
- Energy systems engineers
- Maintenance and technical service managers
- Electrical and automation teams of production facilities

Corporate and Managerial Profiles

- Manufacturer and import company owners
- Wholesale and retail sales representatives
- Export and foreign trade managers
- Dealers and distributors
- Industrial facility managers
- Public and municipal officials
- Energy and infrastructure investors

Project and Implementation Sector

- Construction and contracting companies
- Electrical project offices
- Architecture and interior design offices
- Lighting design firms
- Smart building and automation companies
- EPC (Engineering, Procurement, Construction) contractors

International Visitors

- Distributors operating in export markets
- Buyer delegations from three continents
- Representatives of chambers of commerce and sectoral associations
- International investors and project developers

Academia and Media

- University and vocational school academics
- Technical high school teachers
- Sectoral media representatives

PARTICIPATING

PRODUCT GROUPS

- Smart Home & Building Applications
- Smart Grids
- Batteries, Battery Systems, and Uninterruptible Power Supplies (UPS)
- Switch & Socket Systems and Equipment
- Lighting Systems and Equipment
- Connection Equipment and Technologies
- Building Automation and Control Systems
- Busbar/Busbar Connection Systems
- Distribution Lines and Equipment
- Electric Generators and Transformers
- Electric Motors and Drive Systems
- Electrical Panels and Distribution Systems
- Artificial Intelligence Applications in the Electrical Sector
- Electrical Installation and Infrastructure Products
- Electrical Charging Stations & Hardware and Software
- Electrical Accessories
- Industrial Communication Equipment
- Energy Management Solutions
- Power Quality and Energy Equipment
- Security and Protection Equipment
- HVAC Products and Systems
- Indoor Installation Equipment
- Inverters and Frequency Converters
- Cables and Equipment
- Energy and Low Current Cables
- Compensation Systems and Equipment
- Protection and Control Equipment
- Medium Voltage Power Distribution and Control Systems
- Automation and Control Systems
- Switchgear Materials and Equipment
- Test and Measurement Devices
- Data Center Solutions
- Renewable Energy Solutions
- Lightning Protection and Grounding Systems
